

Productivity. Compliance. Real-Time.

PRP COAST™ OVERVIEW

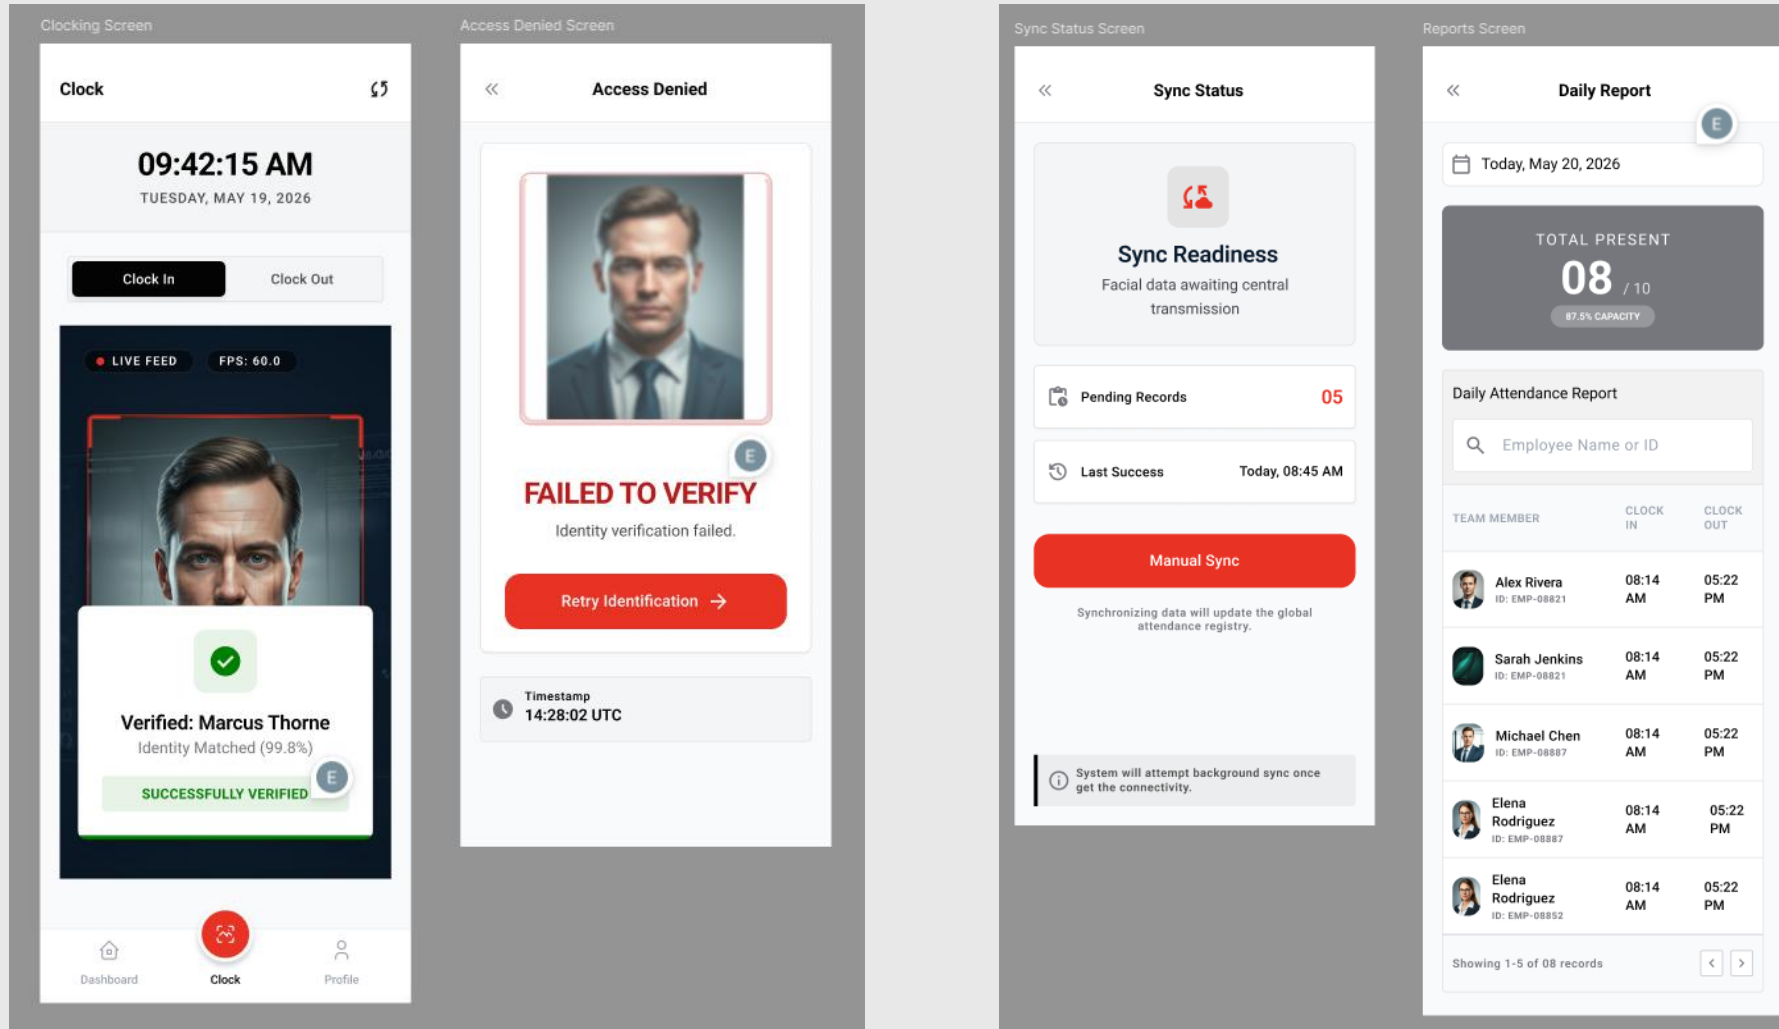

What is PRP Coast™?

- Multi-person clocking on a standard Android device (tablet or smartphone)
- Biometric identification using facial recognition via the device's built-in camera
- Provides a 3rd PRP clocking option between fixed biometric terminals and geo-fenced clocking on the Buzz employee app
- Two primary use cases
 - Supervisor clocks in a team of people via her own smartphone
 - A team clocks in on a shared Android tablet at a workplace
- Supports facial biometric enrolments and clocking
- Single (supervised) and bulk (unsupervised) clocking modes
- Integrates seamlessly into the existing Honeycomb clocking environment

In-field enrolment

Bulk and single shot clocking modes and reporting
